#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 25 April 2005 was filed and is being considered by the examiner.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Santoruvo et al (US 2003/0116552).

Santoruvo et al disclose in Figures 1-9 the following claimed features:

A liquid delivery head (Figure 1, page 1, paragraph [0002]) having heating elements (Figure 1, elements R<sub>DS</sub>) and metal oxide field effect transistors (page 3, paragraph [0034]) to drive said heating elements (Figure 1, elements R<sub>DS</sub>) which are formed on a substrate (11) such that said heating elements driven by said metal oxide field effect transistors (MOSFET) heat a liquid contained in a liquid chamber (30), thereby ejecting said liquid in the form of droplets (46) from nozzles (44), characterized

in that each of said metal oxide field effect transistors (MOSFET) has a polycide gate or a metal gate (pages 2 and 3, paragraph [0031]).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Santoruvo et al (US 2003/0116552) in view of Silverbrook (US 5,841,452).

Santoruvo et al disclose the claimed invention except for reciting the gate has a gate length no larger than 2  $\mu\text{m}$ .

Silverbrook teaches the gate has a gate length no larger than 2  $\mu\text{m}$  (column 27, lines 65-67).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the gate has a gate length no larger than 2  $\mu\text{m}$ , as taught by Silverbrook into Santoruvo et al, for the purpose of getting advantage of using a very fine process (column 27, lines 64-65).
